School: School year: 2019 - 2020 Class: 4M1/ Name: .....

Hello, Mark!

Thank you for asking me about my future job. Well, when I was a child I dreamt of being a photographer because I used to like taking photos of friends and editing them. Then everything has changed since I visited a children hospital in my city. From that point, I decided to become a doctor to help people and stop their suffering.

As for now, I am concentrating my attention on finishing my studies at secondary school. Soon I will take the first important exam of my life - the baccalaureate exam. I won't stop working hard until I pass. As you know, I'm good at English, math, biology and physics. So, if I get it with distinction, I'll study at the Medical University and my dreams may come true. I will try to get more information about that from my teachers and career counselors at my school who are very supportive, gentle and helpful.

It is very hard to choose a career before you finish high school, but always keep in mind that it is important to follow your dream and be good at what you choose.

Best regards, Paul
