

Academic year: 2018/2019

Classes: 3<sup>rd</sup> year ES/TM/EM

First Term Examination

Part One: Reading and interpreting

(15 points)

Read the text carefully then do the following questions

Americans have become less ethical in recent decades when it comes to getting ahead – doing well in school, advancing in their careers and making money. Evidence of this trend can be found in numerous parts of American life.

Scholars of academic integrity find that cheating has increased among high school, college and graduate students. Reports show that tax evasion, workplace theft and occupational fraud have risen and now cost the government billions of dollars a year. The frequency and seriousness of corporate scandals has risen significantly since the 1970s. Ethical problems have risen in key professions. Medicine has been convulsed by reports of widespread conflicts-of-interest involving doctors and pharmaceutical companies. Chronic overbilling has been commonplace in major law firms. The use of performance enhancing drugs in professional sports soared in the 1990s and the last decade has seen an endless string of scandals involving top athletes like Lance Armstrong.

Evidence of America's crisis of ethics is everywhere. However, what is notable is that this alarming shift has occurred at the same time that Americans have actually improved their behaviour in some areas of social behaviour. Crime is way down from because drunken driving deaths have fallen by nearly 40 percent and fewer Americans smoke today than in 1960. The divorce and abortion rates are much lower. In addition, surveys find that Americans are less racist than they were thirty years.
