

Text :

During the preschool years, your child should eat the same foods as the rest of the family, with an emphasis on those with nutritional value. This includes fresh vegetables and fruits, nonfat or low-fat dairy products (milk, yogurt, cheeses), lean meats (chicken, turkey, fish, lean hamburger), and whole grain cereals and bread. At the same time, limit or eliminate the junk food in your child's diet, and get rid of sugared beverages as well.

Tips for feeding your preschooler (3 to 5 years)

- Eat meals and snack prepared at home more often. Prepare healthy homemade recipes.
- Let your child decide what and how much to eat from the foods you offer. Continue to offer a variety of familiar foods and new foods at each meal.
- Offer water between meals. Sipping on milk or juice between meals can decrease appetite. If you give your child juice, offer 100% fruit juice and limit it to 125-175 mL a day.
